Kristie,
Question, would it be possible to have the lab make a note on the report that the TCLP values are skewed based on matrix interference? I may need that in order for the facility to allow us to use the totals data. Let me know what you think.
Thanks,

Subject: CES: FT1002 (TCLP Data)

Kristie:
Reviewing this data made me look at the detection limits associated with FT1002. The rules read that "equal to or exceeding". The following chemicals had issues that I could tell:
2,4-Dinitrotoluene
Hexachlorobenzene
It would appear that I would have to call this waste a hazardous waste only because we could not determine if the waste was equal to or exceeds the Regulary Level.
What is the resolution to this?
I am hoping there are not others like this.
